

Post-Treatment Precautions: Mole Removal / Hair Removal

Mole Removal

- Complete removal may not be possible in one session; re-treatment is possible after two months.
- Apply a regeneration tape for 1–2 weeks. Replace with a new one if it falls off or swells.

Hair Removal

- Shave the treatment area one day before the procedure.
- Avoid waxing or tanning on the treated area before and after the procedure.
- If folliculitis occurs after treatment, contact the clinic.
- Do not pluck hair during the treatment period. Shaving is possible from the day after the procedure, but do so gently.
