

Post-Treatment Precautions: Volnewmer

- Cleansing and makeup are possible immediately after treatment.
- Use lukewarm water rather than hot water when washing your face, as it helps maintain the treatment effect.
- Avoid saunas and hot baths for about one week after the procedure.
- Do not drink alcohol on the day of the procedure.
- If redness occurs right after treatment, it will naturally fade within 1–2 days, so there is no need to worry.
- The skin may feel slightly tight after treatment, so apply sufficient moisturizer.
- Volumer lifting is generally recommended as four sessions, spaced at 1–2 month intervals.
- For maximum treatment effect, use mineral-based or nourishing (regenerative) packs rather than cold packs.
